# FRESH AS A DAISY

Say hello to the new eco-friendly Daisy Doo.

*By Paige Mastrandrea*

Spring is in session and it's time for new beginnings. With Earth Day right behind us, NIBA Designs ([nibadesigns.com](http://nibadesigns.com)) in Hollywood revealed interior designer Laurel Harrington's whimsical, eco-friendly Daisy Doo chair and bar stool by Harrington's Honeydudley furniture brand ([honeydudley.com](http://honeydudley.com)), providing the perfect accent to breathe style and vibrancy into any space.

Proving that sustainability can indeed be trend- and fashion-forward, this handcrafted beauty is created in the U.S. from black walnut, white oak and reharvested poplar. Both the chairs and bar stools are offered in eco-chic wood finishes or a sleek lacquer in matte or gloss. Saying goodbye to disposable design and hello to a brighter and more beautiful future, Daisy Doo is in full bloom. ■
